Caller extension ID

When you call another corporate extension using your mobile with SoLo, called party sees your extension number, as if you were in your office

Call filtering

Users can customize their phone, choosing to forward external calls only, internal calls only, all calls, or no call with just one click on the GSM menu

Caller ID displayed on your mobile

SoLo displays the original caller ID

Call log and reporting

Users can have log files and reports about all incoming and outgoing telephone traffic of every mobile and its paired extension

Mobile/desk phone interchange

SoLo enables you to start a call with your mobile and continue it with your desk phone without interruptions, just picking up the receiver and pushing the appropriate key

SoSoftware reserves the right to change, add and/or remove any function and/or service provided by the Product at any time and without notice

MOBILITY OF MIND

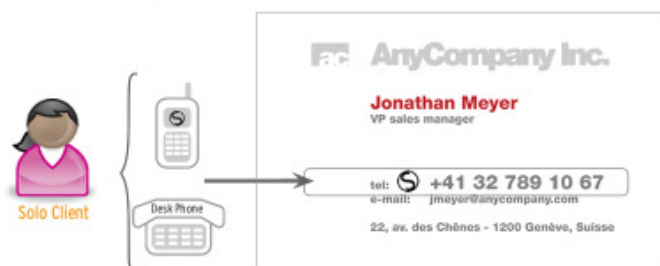

SoLo | mobile solutions

Access Avaya IP OFFICE functions from your mobile. Users can now:

- Access FULL Avaya IP Office functions from their mobile
- Decide when to be available WITH REMOTE ACCESS, remotely enabling or disabling Twinning
- Enable/disable their desk phone CALL FORWARDING settings
- Make calls showing their One Business Number
- Make calls setting hidden ID
- Simultaneous ringing: when SoLo is active, all associated phones ring at the same time. In-coming calls are automatically forwarded to called party. When called party is not available calls are forwarded to voice mail
- Access all their functions with one click on their GSM menu. They can set a key to enable/disable SoLo if they have Avaya digital or IP phones with customizable function keys
- Customize 10 features on their own GSM!

One person = One Personal Number = SoLo

Quick and easy installation

Simply download SoLo DTMF Client from our website (www.sosoftware.com)
