MOBILITY OF MIND

SoLo DTMF Client gives any company full mobility for their employees with PBX features on the GSM. You can substitute DECT phones now!

Your PBX functions can be easily and quickly configured into SoLo DTMF Client: e.g. calls can be routed through the corporate PBX transforming all mobile calls into fixed calls with drastic cost reductions; you could see all the corporate calls (mobile + fixed); you could have one network to manage!

No hardware to be installed! *

SoLo DTMF is CUSTOMIZABLE. Increase your Brand Impact now!

How? Put your Logo on Mobile Screens!

* Server required only for Avaya PBXs model Small Office, IP Office 403, 406, 412

Your Benefits:

- CUSTOMIZABLE: GET VISIBILITY NOW! Put YOUR LOGO on your customers' mobile phone screens
- NO HARDWARE NEEDED: Easy-to-sell mobile integration solution. LEVERAGE your existing base
- Easy to install. Simply download SoLo DTMF Client and start using it!

MOBILITY OF MIND

SoLo | mobile solutions

Your Customer's Benefits:

- NO HARDWARE NEEDED= LOW INVESTMENT
- User-friendly mobile services
- Better responsiveness
- Higher productivity
- Only one business number always connected to your office
- Easy to use all over the world without increasing hardware and maintenance costs
- Drastic cost reduction (up to 60%): mobile calls are routed through corporate PBX and thus are charged as fixed calls
- Possibility to call using your corporate network
- Called party will see your office number
- Possibility to forward calls to your voice mail when you are not available
- Your voice mail messages directly sent to your e-mail box
- Logging and reporting all incoming and outgoing telephone traffic of every mobile and its paired extension
- Thanks to SoLo DTMF Client, you can have one business number only for desk and mobile phones (SoLo= One Business Number)

Are you looking for the real Mobility Solution?

SoLo DTMF Client works just now with all PBXs with DISA service and DTMF tone recognition, for example on:

PABXs tested by SoSoftware:

Examples of compatible PABXs:

Caller extension ID

When you call another corporate extension using your mobile with SoLo, called party sees your extension number, as if you were in your office

Call filtering

Users can customize their phone, choosing to forward external calls only, internal calls only, all calls, or no call with just one click on the GSM menu

Caller ID displayed on your mobile

SoLo displays the original caller ID

Call log and reporting

Users can have log files and reports about all incoming and outgoing telephone traffic of every mobile and its paired extension

Mobile/desk phone interchange

SoLo enables you to start a call with your mobile and continue it with your desk phone without interruptions, just picking up the receiver and pushing the appropriate key

SoSoftware reserves the right to change, add and/or remove any function and/or service provided by the Product at any time and without notice

MOBILITY OF MIND

SoLo | mobile solutions

Access PBX functions from your mobile. Users can now:

- Access PBX functions from their mobile
- Decide when to be available WITH REMOTE ACCESS, remotely enabling or disabling Twinning, where present
- Enable/disable their desk phone CALL FORWARDING settings
- Make calls showing their one business number
- Make calls setting hidden ID
- Simultaneous ringing: when SoLo is active, all associated phones ring at the same time. Incoming calls are automatically forwarded to called party. When called party is not available calls are forwarded to voice mail
- Access all their functions with one click on their GSM menu. They can set a key to enable/disable SoLo if they have digital or IP phones with customizable function keys
- Customize some features on their own GSM!

One person = One Personal Number = SoLo

Quick and easy installation

Simply download SoLo DTMF Client from our website (www.sosoftware.com)

Server required only for Avaya PABXs model Small Office, IP Office 403, 406, 412
